LET'S HEAT THINGS UP

- **THERMAL** ACCELERATED NANO CRYSTAL SANITATION TECHNOLOGY
- THERMAL CLEANING and DISINFECTION – AUTOCLAVE, DISHWASHER, HOT PRESSURE WASHERS, COOKING – YOUR TURN!

- The body is usually able to dissipate the heat by either radiation of heat through the skin or by evaporation of sweat. However, in extreme heat, high humidity, or vigorous exertion under the sun, the body may not be able to dissipate the heat and the body temperature rises.

I WANNA GO FAST!

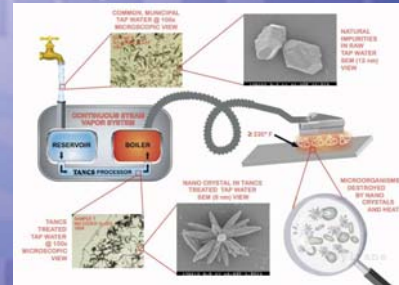

WORK FASTER???

- No – I'm not suggesting you have to work faster or harder – just BETTER!
- Get better results faster by ACCELERATING the cleaning power of heat.

**BETTER RESULTS + LESS TIME =
INCREASED PRODUCTIVITY**

ACCELERATED

BONUS QUESTION

What does TANCE stand for??

SIZE MATTERS

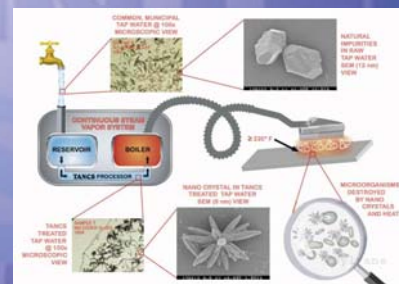

- Already proven in MICROfibre, ipod NANO, MICROchip, MICROscope...
- Microfiber textiles designed for cleaning allow cleaning on a microscopic scale. Thus, according to tests, using microfiber materials to clean a surface leads to reducing the number of bacteria by 99% whereas a conventional cleaning material reduces this number only by 33%.
